

Circular connectors for servomotors and power supply

This compact M12 connector with PE contact comes into play if you want more power. It is used to supply power to three-phase motors (630 V, 12 A per contact). The K-coding prevents incorrect plugging with other connectors.

Low weight

Space requirement

Waterproof

Benefits

The service-friendly screw connection makes assembly possible without a special tool, and is suitable for connections which need to be detached again.

Available in different designs.

High stability thanks to impact-resistant polyamide.

Powerful up to 12 A despite extremely space-saving size for the tightest of spaces.

Mechanical K-coding of the mating face prevents mismating with mating connector.

Application range

Good oil and chemical resistance.

For connecting three-phase motors with up to 7.5 kW.

For power supply connection of devices and machines in various applications.
