UNITRONIC® TRAIN

Reduced flame spreading increases the protection against damage to persons and property in the event of a fire EMC-optimised design

Application range

The communication systems WTB (wire train bus) and MVB (multifunction vehicle bus) make up the so-called TCN (train communication network)

UNITRONIC® TRAIN bus cables are designed for use in TCN acc. IEC 61375

MVB according IEC 61375-3-1

WTB according IEC 61375-2-1

For use in railway vehicles and buses, for fixed installations and applications where limited movement may occur Also applicable within oily environments and areas with increased ambient temperature
