J-Y(ST)Y...LG Indoor Cable

Installation cable in accordance with DIN VDE 0815

J-Y(ST)Y...LG indoor installation cable for telecommunication/ information processing, solid conductor/ stationary use, layered stranding, static foil, VDE 0815

Interference signals

Benefits

Indoor telephone cables transmit analogue or digital signals
Aluminium-laminated plastic foil static screen with tin-plated drain wire minimises the interference of high frequency, electromagnetic fields
Decoupling of circuits by means of
twisted-pair (TP) design (crosstalk effects)

Application range

Connection cable for use in electronics and in measurement, control and signal applications
In news and communication applications, the following connections can be installed: telephone, telefax, telex, standard modems for postal services; burglar and fire alarm systems (cf. fire alarm cables); communication and paging systems; access control, time and data control systems
Can be used in dry and wet interiors for fixed installation on and under plaster

Product features

The 2-paired versions = star quad cable design
Flame-retardant according IEC 60332-1-2
